DETAILED ACTION

Claim Rejections - 35 U.S.C. 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.
- 1. Claims 12, 14-15 and 17-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Brinkman (US patent US006351578B).

Brinkman's device discloses an optical system including the method of forming optical transmission comprising a substrate (445) with a waveguide channel (425), or multiple waveguides (see fig. 1A, the contour channel (see fig. 1A) with ion material and partially buried in the substrate, diffusion into the substrate (col. 1, lines 44-66), the contoured channels varies in width and in height (see fig. 1A), the formation of the trench and channel by etching or other similar technique (see col. 10), the light propagating features (col. 8 of fig. 4),

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2839

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brinkman (Us patent US006351578B) in view of Bischel's (US patentUS005911018A).

Brinkman's device discloses the aforementioned limitations, but fails to explicitly disclose the dimensional features and wavegude paths. Bischel's device discloses a taper (188, fig. 6) at with at least two dimensions (see col. 2); the waveguide defining the optical axis, the waveguide channel elongating along the light propagation path (cols. 2-4). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to add the taper means such as the one taught in Bischel's structure for improving the interconnection of Brinkman's device.

Response to Argument

Applicant's arguments filed on 7/14/2003 have been fully considered but they are not persuasive. The claims do not define "structural structure features" that distinguish over prior art: The method of forming the device is not germane to the issue of patentability by itself. Therefore, this limitation has not been given any patentable weight. Furthermore, applicant's argument that there is no suggestion to combine the references, the examiner recognizes that references cannot be arbitrary combined and that there must be some reason why one skill in the art would be motivated to make the proposed combination of the primary and the secondary references. In re Nomiya, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the

Art Unit: 2839

combination of the disclosures taken as a whole would suggest to one of ordinary skill in the art. In re McLaughlin, 170 USPQ 209 (CCPA 1971). Reference are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In re Bozek, 163 USPQ 545 (CCPA 1969. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Conclusion

3. Claims 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2839

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean Duverne whose telephone number is (703) 305 - 0297. The examiner can normally be reached from 8:30 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn Feild, can be reached on (703)308-2710. The fax phone number for this Group is (703) 308 - 7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
